Autophagy
Chaperone Mediated Autophagy
Cellular responses to stimuli
Cellular responses to stress
Cellular response to starvation
Response of EIF2AK4 (GCN2) to amino acid deficiency
Developmental Biology
Nervous system development
Axon guidance
NCAM signaling for neurite out−growth
Signaling by ROBO receptors
Regulation of expression of SLITs and ROBOs
Disease
Diseases of signal transduction by growth factor receptors and second messengers
Signaling by FGFR in disease
Signaling by FGFR1 in disease
Signaling by KIT in disease
Signaling by phosphorylated juxtamembrane, extracellular and kinase domain KIT m
Signaling by PDGFR in disease
FLT3 signaling in disease
Infectious disease
Bacterial Infection Pathways
Infection with Mycobacterium tuberculosis
Viral Infection Pathways
Influenza Infection
Influenza Viral RNA Transcription and Replication
SARS−CoV Infections
Potential therapeutics for SARS
SARS−CoV−2 Infection
Gene expression (Transcription)
RNA Polymerase II Transcription
Generic Transcription Pathway
Transcriptional Regulation by MECP2
MECP2 regulates neuronal receptors and channels
FOXO−mediated transcription
Hemostasis
Cell surface interactions at the vascular wall
Platelet activation, signaling and aggregation
Platelet Aggregation (Plug Formation)
Immune System
Adaptive Immune System
Immunoregulatory interactions between a Lymphoid and a non−Lymphoid cell
TCR signaling
Phosphorylation of CD3 and TCR zeta chains
Translocation of ZAP−70 to Immunological synapse
Generation of second messenger molecules
Costimulation by the CD28 family
Class I MHC mediated antigen processing & presentation
Antigen processing−Cross presentation
ER−Phagosome pathway
Antigen Presentation: Folding, assembly and peptide loading of class I MHC
Signaling by the B Cell Receptor (BCR)
Antigen activates B Cell Receptor (BCR) leading to generation of second messenge
Cytokine Signaling in Immune system
Signaling by Interleukins
Interleukin−2 family signaling
Interleukin−15 signaling
TNFR2 non−canonical NF−kB pathway
TNF receptor superfamily (TNFSF) members mediating non−canonical NF−kB pathway
Interferon Signaling
Interferon gamma signaling
Interferon alpha/beta signaling
Signaling by CSF1 (M−CSF) in myeloid cells
Innate Immune System
Nucleotide−binding domain, leucine rich repeat containing receptor (NLR) signali
Inflammasomes
DAP12 interactions
DAP12 signaling
Fc epsilon receptor (FCERI) signaling
FCERI mediated MAPK activation
Metabolism
Metabolism of amino acids and derivatives
Selenoamino acid metabolism
Selenocysteine synthesis
Metabolism of RNA
Nonsense−Mediated Decay (NMD)
Nonsense Mediated Decay (NMD) independent of the Exon Junction Complex (EJC)
Nonsense Mediated Decay (NMD) enhanced by the Exon Junction Complex (EJC)
rRNA processing
rRNA processing in the mitochondrion
rRNA processing in the nucleus and cytosol
Major pathway of rRNA processing in the nucleolus and cytosol
tRNA processing
tRNA processing in the mitochondrion
Metabolism of proteins
Translation
Eukaryotic Translation Elongation
Peptide chain elongation
Eukaryotic Translation Initiation
L13a−mediated translational silencing of Ceruloplasmin expression
Cap−dependent Translation Initiation
Formation of a pool of free 40S subunits
GTP hydrolysis and joining of the 60S ribosomal subunit
Eukaryotic Translation Termination
Signal Transduction
Integrin signaling
Signaling by GPCR
GPCR downstream signalling
G alpha (q) signalling events
Gastrin−CREB signalling pathway via PKC and MAPK
GPCR ligand binding
Class A/1 (Rhodopsin−like receptors)
Signaling by Nuclear Receptors
ESR−mediated signaling
Signaling by Receptor Tyrosine Kinases
Signaling by ERBB2
Signaling by SCF−KIT
Signaling by EGFR

CD4 Naive
CD4 CM
CD4 EM
CD4 Treg
CD8 Naive
CD8 Memory
CD4 Naive
CD4 CM
CD4 EM
CD4 Treg
CD8 Naive
CD8 Memory
