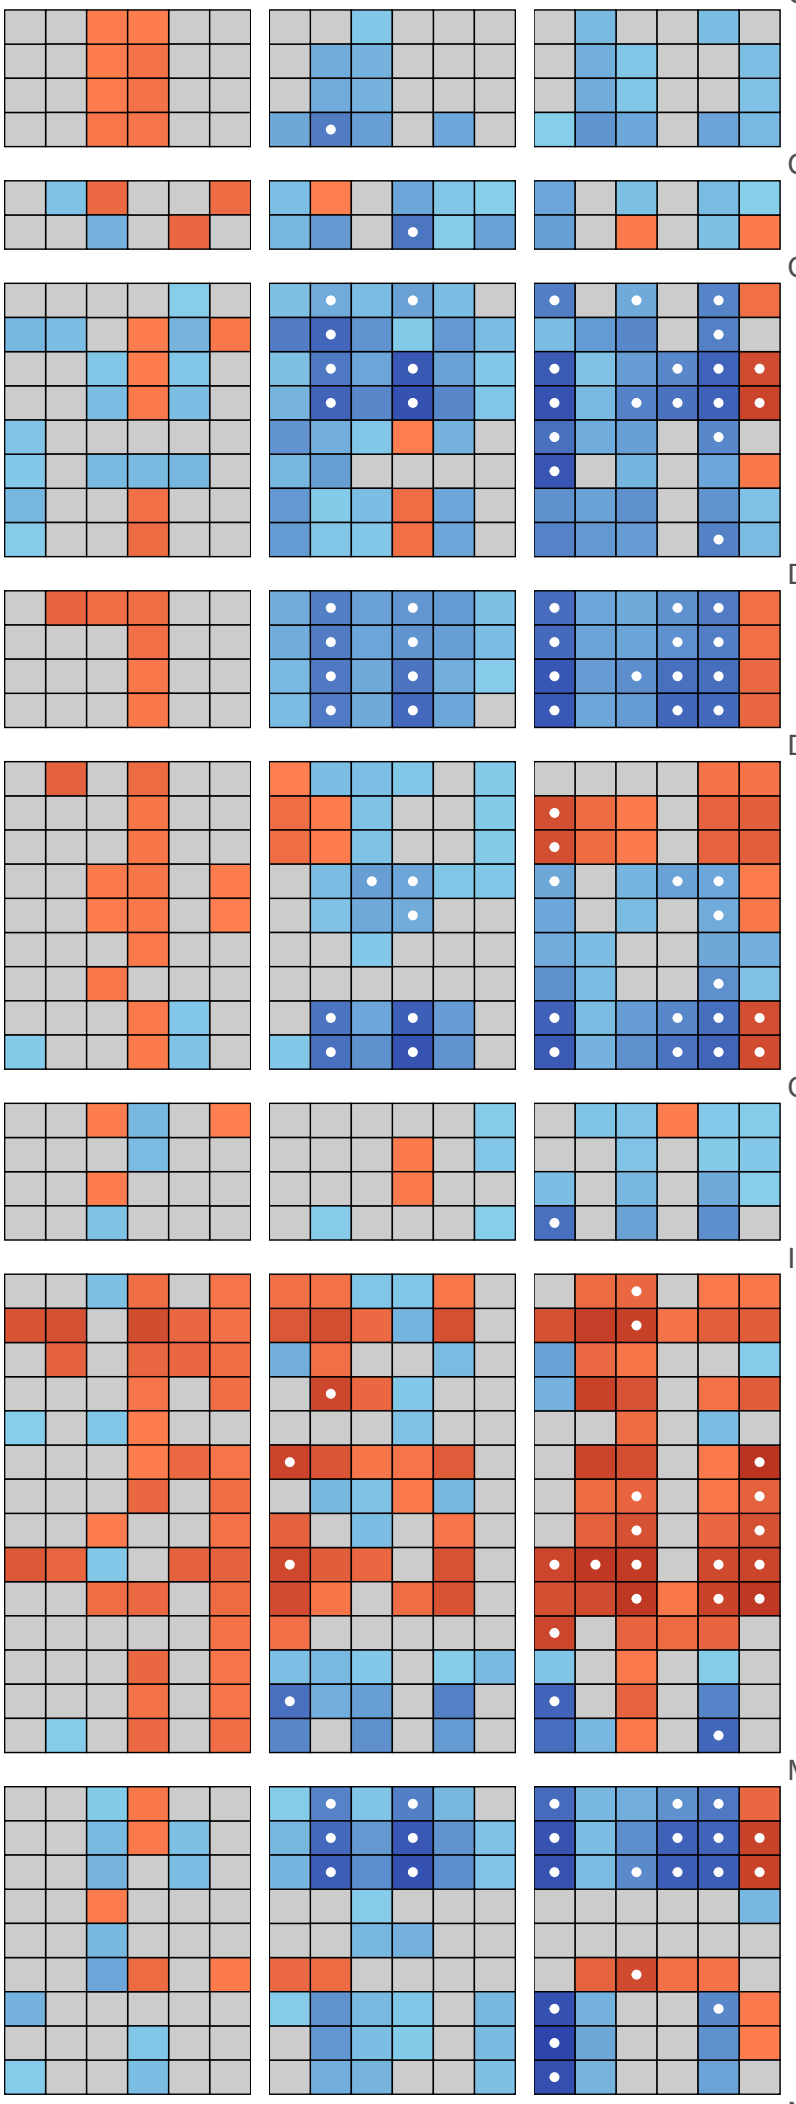
enalidomide, 4 Hou
nalidomide, 24 Hou
nalidomide, 72 Hou



Cell Cycle
Cell Cycle, Mitotic
Mitotic G2−G2/M phases
G2/M Transition
The role of GTSE1 in G2/M progression after G2 checkpoint
Cell−Cell communication
Cell junction organization
Cell−extracellular matrix interactions
Cellular responses to stimuli
Cellular responses to stress
HSP90 chaperone cycle for steroid hormone receptors (SHR) in the presence of lig
Cellular response to starvation
Response of EIF2AK4 (GCN2) to amino acid deficiency
Cellular response to chemical stress
Cytoprotection by HMOX1
KEAP1−NFE2L2 pathway
Nuclear events mediated by NFE2L2
Developmental Biology
Nervous system development
Axon guidance
Signaling by ROBO receptors
Regulation of expression of SLITs and ROBOs
Disease
Diseases of signal transduction by growth factor receptors and second messengers
Signaling by ALK in cancer
Signaling by ALK fusions and activated point mutants
Infectious disease
Viral Infection Pathways
HIV Infection
HIV Life Cycle
Influenza Infection
Influenza Viral RNA Transcription and Replication
Gene expression (Transcription)
RNA Polymerase II Transcription
Generic Transcription Pathway
Transcriptional Regulation by TP53
TP53 Regulates Metabolic Genes
Immune System
Adaptive Immune System
Immunoregulatory interactions between a Lymphoid and a non−Lymphoid cell
TCR signaling
Translocation of ZAP−70 to Immunological synapse
Class I MHC mediated antigen processing & presentation
Antigen Presentation: Folding, assembly and peptide loading of class I MHC
Cytokine Signaling in Immune system
Interferon Signaling
Interferon gamma signaling
Interferon alpha/beta signaling
Signaling by CSF1 (M−CSF) in myeloid cells
Innate Immune System
Nucleotide−binding domain, leucine rich repeat containing receptor (NLR) signali
Inflammasomes
Metabolism
Metabolism of amino acids and derivatives
Selenoamino acid metabolism
Selenocysteine synthesis
Metabolism of lipids
Fatty acid metabolism
Arachidonic acid metabolism
The citric acid (TCA) cycle and respiratory electron transport
Respiratory electron transport, ATP synthesis by chemiosmotic coupling, and heat
Respiratory electron transport
Metabolism of RNA
Mitochondrial RNA degradation
FASTK family proteins regulate processing and stability of mitochondrial RNAs
Nonsense−Mediated Decay (NMD)
Nonsense Mediated Decay (NMD) independent of the Exon Junction Complex (EJC)
Nonsense Mediated Decay (NMD) enhanced by the Exon Junction Complex (EJC)
rRNA processing
rRNA processing in the mitochondrion
rRNA processing in the nucleus and cytosol
Major pathway of rRNA processing in the nucleolus and cytosol
tRNA processing
tRNA processing in the mitochondrion
Metabolism of proteins
Mitochondrial protein degradation
Protein folding
Chaperonin−mediated protein folding
Translation
Eukaryotic Translation Elongation
Peptide chain elongation
SRP−dependent cotranslational protein targeting to membrane
Eukaryotic Translation Initiation
L13a−mediated translational silencing of Ceruloplasmin expression
Cap−dependent Translation Initiation
Activation of the mRNA upon binding of the cap−binding complex and eIFs, and sub
Formation of a pool of free 40S subunits
Formation of the ternary complex, and subsequently, the 43S complex
Ribosomal scanning and start codon recognition
GTP hydrolysis and joining of the 60S ribosomal subunit
Eukaryotic Translation Termination
Neuronal System
Protein−protein interactions at synapses
Programmed Cell Death
Apoptosis
Intrinsic Pathway for Apoptosis
Activation of BH3−only proteins
Activation of BAD and translocation to mitochondria
Signal Transduction
Intracellular signaling by second messengers
PIP3 activates AKT signaling
PTEN Regulation
Regulation of PTEN mRNA translation
Signaling by NOTCH
Signaling by NOTCH3
NOTCH3 Intracellular Domain Regulates Transcription
Signaling by Nuclear Receptors
ESR−mediated signaling
Estrogen−dependent gene expression
Signaling by Receptor Tyrosine Kinases
Signaling by VEGF
VEGFA−VEGFR2 Pathway
VEGFR2 mediated vascular permeability
Signaling by Rho GTPases, Miro GTPases and RHOBTB3
Signaling by Rho GTPases
RHO GTPase Effectors
RHO GTPases activate IQGAPs
RHO GTPase cycle
RHOA GTPase cycle
Transport of small molecules
SLC−mediated transmembrane transport
Transport of inorganic cations/anions and amino acids/oligopeptides
Vesicle−mediated transport
Membrane Trafficking
Gap junction trafficking and regulation
Gap junction trafficking

CD4 Naive
CD4 CM
CD4 EM
CD4 Treg
CD8 Naive
CD8 Memory
